COLOUR KEY

BEFORE YOU START

A NOTE ON TAX

Finance Tracker

You only ever type in three sheets. Everything else calculates itself.

Set your tax rate and edit the category lists. Do this once.

Log every invoice. One row per invoice.

Log every business expense. One row per expense.

Reads automatically. Never type here.

Reads automatically. Never type here.

Reads automatically. Shows which clients are actually worth it.

Yellow cells are for you to fill in.

White cells contain formulas. Typing over one breaks it.

Each log sheet has one example row so you can see the expected format.

Delete it once you have entered your own data.

The tax set-aside is a planning estimate based on the rate you enter.

It is not tax advice and does not replace an accountant.

Income — one row per invoice

Yellow = type here. Leave 'Date paid' empty until the invoice is actually paid.

[illegible]

Expenses — one row per expense

Yellow = type here. Mark 'Deductible' as Yes or No.

Date	Supplier	Description
2026-01-08	Adobe	Creative Cloud subscription

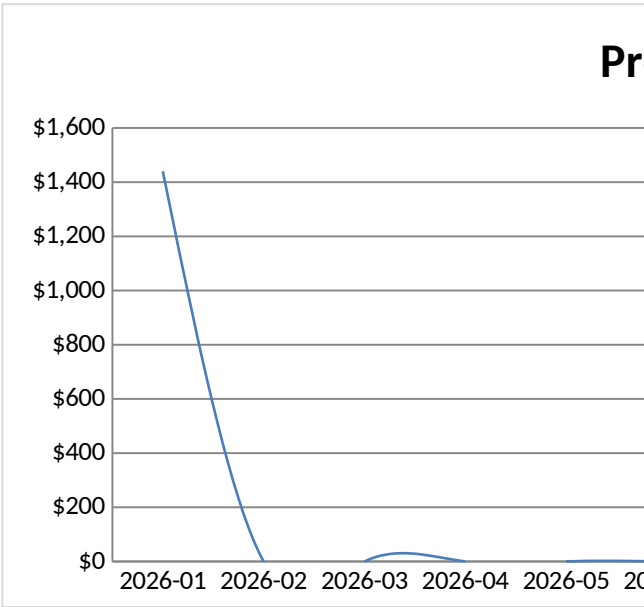

Category	Amount	Deductible
Software	\$59.99	Yes

Monthly Summary — calculated automatically

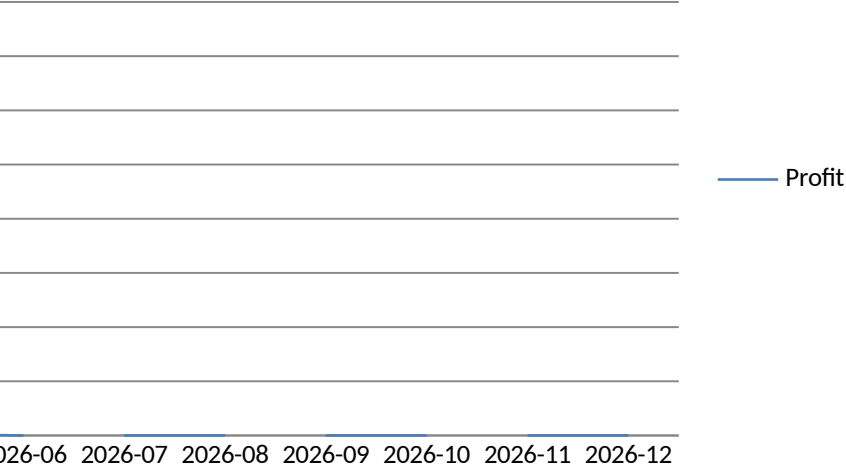

Every figure here is a formula. Do not type in this sheet.

Month	Income invoiced	Income received	Expenses	Profit

Clients — who is actually worth your time

Type a client name in column A exactly as written in the Income sheet. The rest calculates.
